

## **Yield to Pedestrians**

Motorists are required to yield to pedestrians in crosswalks. This requires anticipation of pedestrian movements and attention to pedestrians moving along a roadway. The City has recently installed warning signage at crossings which are part of the City's Hike/Bike Trail.

These devices are bright yellow and have pedestrian activated flashing lights. At this time of year when daylight shortens, motorists need to be extremely cautious and aware. This signage will help to alert motorists and protect the pedestrians as they attempt to cross very busy streets.

Do your part for road safety, give pedestrians a break!
