

The City of Kearney has opened a new Household Hazardous Waste (HHW) Facility to accommodate the growing HHW Program. This new facility is located at 3620 Box Butte Avenue, which is directly behind the Kearney Area Recycling Center. Residents are encouraged to bring any household hazardous waste they may have to the 24-hour drop off location.

This new facility also features a recycling drop-off location and a "Restore". Our goal is to make recycling as easy and convenient as possible by providing a place that residents can take their regular recycling and their household hazardous waste, a "one stop" recycling location.

Occasionally, residents leave items at the household hazardous waste drop-off that is in good, usable condition. Items like this, such as paint, stain and yard care chemicals that are in this condition are then placed into the "Restore", a place that residents can then take these items home at no charge.
